INSTALLING THE BDVRVIEWER APP ON YOUR BLACKBERRY

The BDVRViewer application allows you to remotely view your DVR on your Blackberry.

Prerequisites

- Blackberry 9000 or 9700 only
- An APN name, **obtained from your Blackberry service provider** (Digimerge does not provide this)
- A DDNS account from https://secure.digimerge.net/webapp/

! **You must port forward your router before you can connect to your system using a mobile device**

Step 1 of 4: Download the BDVRViewer Application

1. Open the web browser on your Blackberry, and go to **http://mobile.digi1.net/java**
2. Click on the **BlackBerry Test Release** link.
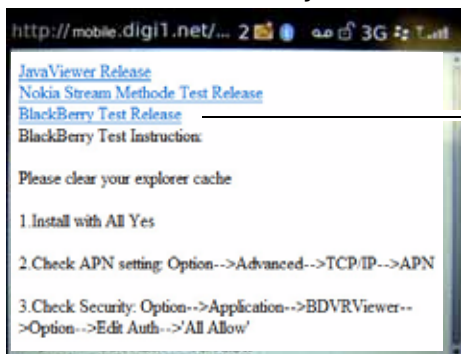

BlackBerry Test Release

3. Click the **Download** button. Click **Yes** to any download warnings.

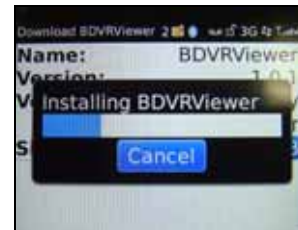

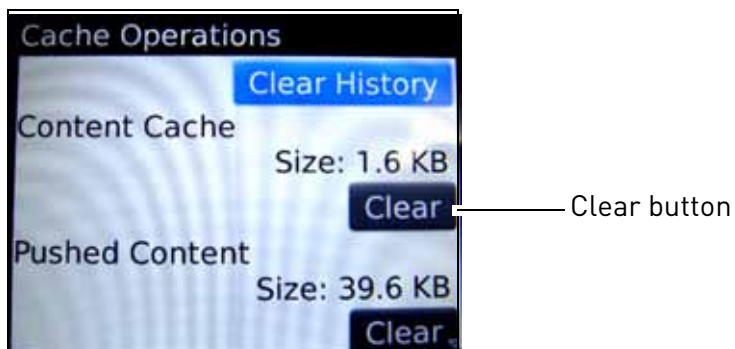

4. Click **OK** to exit.

Step 2 of 4: Clear your browser cache

You must clear your browser cache for the BDVRViewer application to run properly.

1. Open the web browser on your Blackberry, and then press ![blackberry icon] .
2. Click **Options**.

Options

3. Beside Content Cache, click the **Clear** button.

Clear button

4. Exit the web browser to save your changes.
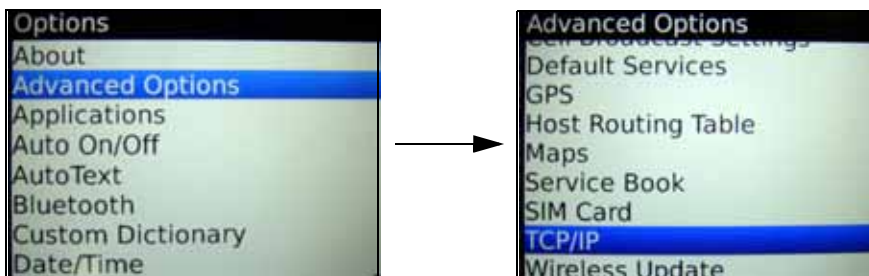

Step 3 of 4: Enable APN (Access Point Name)

In order for BDVRViewer to function, you must enable APN (Access Point Name) on your Blackberry. Contact your service provider for your Blackberry's APN name.

To enable APN:

1. Press the Menu button (   ).
2. Open the **Options** menu.

Options folder

3. Select **Advanced Options** → **TCP/IP**

4. Select the checkbox beside **APN Settings** to enable APN.

Example

APN address

5. Beside APN, enter your APN address. **You must obtain the APN from your local service provider.**
6. Exit to save your settings.

Step 4 of 4: Log in to BDVRViewer

1. Press the Menu button ( ) and then open the Downloads folder.

BDVRViewer

2. Click on the **BDVRViewer** icon.
3. Enter the DVR DDNS address, port number, ID, and password, and then click **LOGIN**.

Enter the DVR's DDNS address (i.e. tomsmith.digimerge.net)

Enter the DVR's port number (i.e. port 80)
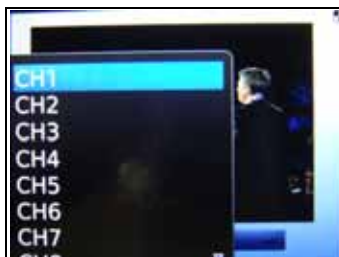

Enter the DVR's login ID (default: admin)

Enter the DVR's password (default: 000000)

4. A network security window opens. Click **Yes** to connect to the DVR.

Viewing Tips

• During viewing, press the Menu button ( ) to open the channel options window. Select the desired channel to view in full screen, or select a group of 4 channels to view in quad mode.

Channel options   Single channel   Quad view
